

Border Creations

What is Landscape Curb?

...is a continuous custom concrete border extruded from a landscape curb machine that creates an extremely durable and permanent border between flower beds and lawn.

Main Benefits

- Eye-catching distinctive new look
- Greatly improves landscape appearance
- Color & style selection compliments architectural style of homes & buildings
- Circles, bends, right angles...no problem
- Fast, clean installation
- Border existing flower beds without disturbing landscape
- Increases property value

BORDER CREATIONS

3 Curbing styles to choose from...

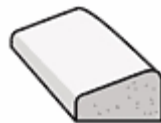

- **Traditional Edge (mower style)** - A beautiful curb that is popular among homeowners looking to make mowing the lawn a breeze. Simply place one wheel of the mower on the curb, and never use a string trimmer again.

- **Slant Edge** - Our most popular curb, featuring the ability to texture and make impressions within the curb, for a look that everyone will compliment.

- **Low Profile Slant Edge** - Identical to the slant edge above, just not as tall. This curb still allows for texturing and impressions to compliment any landscape architecture.

Commercial Curbs also available

Available Textures & Impressions

- Ashlar
- Single Brick (Soldier Course)
- Basketweave
- Double Basketweave
- Random stone
- Custom Score
- Cobblestone
- Tile (6", 8", 12")
- Paver
- Flagstone
- Spanish Texture
- Slate Texture
- Granite Texture

Commonly Asked Questions

Q : Is a concrete truck used for the installation of my concrete curbing?

A : No, concrete is mixed on site out of our curbing trailer. There is no risk for damaging your driveway with a heavy truck, or rutting your yard.

Q : How long will it take to install my concrete border?

A : It varies by how many feet are to be installed, but most jobs are completed in one day, start to finish.

Q : When should we contact you for installation of curbing at a new construction?

A : Typically it works out best to have your curbing installed prior to your landscape materials and sod. This way sod can be laid right up to the curbing creating a clean crisp landscape.
